

Partnering - Cardiovascular, renal & metabolic

Novartis aims to change the course of cardiovascular, renal and metabolic disease by shifting from late crisis management to protecting hearts, kidneys and metabolism much earlier in life. Our science reimagines how we reduce risk and preserve organ function over the long term using next-generation platforms to deliver deeper, more durable benefits for patients. We seek bold, like-minded partners in CRM, uniting their breakthrough ideas with our global R&D engine, diverse technology platforms and leading dealmaking capabilities to bring transformative therapies to patients at scale.
