

Therapeutic Areas

Therapeutic Areas

Our innovative medicines strike the balance between bold science and a deep understanding of the human experience of disease.

In an era when global health challenges are greater than ever, and where medical science is advancing at an unprecedented rate, we have the opportunity to make a real difference for patients and society.

Explore how we are focusing where we can have the greatest impact; in therapeutic areas where there are high unmet patient needs.

Imagine a world where disease doesn't stop you living your life on your own terms. Where treatment happens with you, not to you. Where medicines reduce the burden of disease for people and society. At Novartis, our teams are more energized than ever to work together and with partners in industry and academia to turn scientific breakthroughs into medicines that change lives.

Together, let's reimagine medicine to improve and extend people's lives.

Areas of Focus

Cardiovascular, renal and metabolic

Transforming the treatment and healthcare system landscape using early interventions, pioneering treatments, and innovative partnerships to avoid preventable mortality from cardiovascular disease (CVD), the world's biggest killer, and ease the burden for people living with rare and progressive kidney disease by extending dialysis-free life.

Immunology

Working to create a world where the millions of people with immunological conditions, and those who treat them, can live without compromise.

[Learn more](#)

Neuroscience

Creating a transformational impact for people living with severe neurological conditions and their caregivers by discovering, developing and delivering innovative medicines that change the course of disease progression.

[Learn more](#)

Oncology

Combining the power of science and empathy to unravel the inner workings of cancer and develop innovative therapies that restore hope to those with cancer and their loved ones.
